**Product name:N-Nitroso-N-phenylhydroxylamine aluminum salt**

**CAS:15305-07-4**

**Molecular Weight:438.34**

Item	Specification
Boiling point	168-170°C
Density	1.389[at 20°C]
Melting point	167-170°C
Vapor pressure	0Pa at 20°C
SOLUBLE	280µg/L at 20°C
Storage conditions	below 5° C

## Application:

The precipitation formed by N-Nitroso-N-phenylhydroxylamine aluminum salt complexed with certain metals has a special effect, such as the precipitation tris (N-nitroso-N-phenylhydroxylamine) aluminum salt formed with aluminum. It can be used as an inhibitor and polymerization inhibitor for UV formulation products, with better effects than traditional commonly used inhibitors such as hydroquinone and p-methoxyphenol. It can be used to extend the storage time of olefin resins and is suitable for UV inks, UV coatings, UV adhesives, photoresist, unsaturated polyester resins, vinyl monomers, and acrylic oligomers. It is widely used.
