**Product name: Zinc methacrylate**

**CAS: 13189-00-9**

**Molecular Weight: 235.55**

Item	Specification
Vapor pressure	0Pa at 20°C
Density	1,4 g/cm <sup>3</sup>
Melting point	229-232 °C(lit.)
proportion	1.48
SOLUBLE	100mg/L at 20°C
Storage conditions	Inert atmosphere, Room Temperature

## Application:

Zinc methacrylate is a rubber vulcanizing agent and heat-resistant filler, as well as a crosslinking agent for artificial marble. It has the properties of acid resistance, alkali resistance, oil resistance, corrosion resistance, and high temperature resistance. When combined with rubber, it can obtain salt cross-linking bonds, improve the strength of vulcanized rubber, and enhance high and low temperature performance. In addition, it can improve elasticity, increase tear resistance, reduce white carbon black, and reinforce the compression permanence of the adhesive material.

## Package:

Usually packed in 25kg/drum, and also can be do customized package.
