Application:

β - Amylase is used as a saccharifying agent in the food industry for the production of malt syrup, beer, bread, and other products. In the pharmaceutical industry, an important use of β - amylase is to produce maltose. The absorption of maltose does not depend on the pancreatic islet cord, so even diabetics can take appropriate amounts of it. In medicine, beta amylase can also be used together with alpha amylase as a digestive aid.
