Contact: +86-18653132120

Application:

Lithium magnesium silicate has thickening and thixotropy and strong adsorption capacity. Therefore, it is very suitable for cosmetics, and can properly improve the viscosity and suspension, thickening, moisturizing, lubricating, etc., coupled with the above adsorption properties, it can enhance the adhesion of cosmetics, skin care products, and no cracking, no shedding, bactericidal performance, in toothpaste can replace some wear, adsorption bacteria. Lithium magnesium silicate is widely used in toothpaste, cosmetics, latex paint, ink and other daily chemical industry as a suspension agent, paste thixotropic agent, emulsion and ink stabilizer and thickener.

Package:

25kg/drum or according to customer requirements.
