

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Poly(diallyldimethylammonium chloride)

CAS: 26062-79-3

Molecular Weight: 491.06

Item	Specification
MW	491.06
Density	1.09 g/mL at 25 °C
Purity	99%
flash point	100 °C
resistivity	n20/D 1.417
stability	stable

Application:

Poly (diallyldimethylammonium chloride) is a linear polymer with cationic groups. Therefore, it exhibits physical and chemical functions such as adsorption, charge neutralization, and ion exchange that neutral polymers have never had before. Cationic polymers have relatively fixed positive charges and strong adhesion to surfaces such as fibers and plastics with negative charges. They are widely used as antistatic agents, spinning oil agents, flocculants, and other synthetic materials.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
