

Technical Data Sheet

Name: 4-Hydroxy-4'-isopropoxydiphenylsulfone

CAS: 95235-30-6

Purity: 99%

Molecular Formula: C₁₅H₁₆O₄S

Molecular Weight: 292.35

Technical indicators:

ITEM	STANDARD
Appearance	White powder
Moisture	≤0.2%
Purity	≥99%
Melting point	128°C

Application:

4-hydroxy-4'-isopropoxy-diphenyl sulfone is often used as esterification reagent, dehydration reagent and reducing agent in organic synthesis.

It can be used in the synthesis of different classes of organic compounds, for example, as an important intermediate in the synthesis of heterocyclic compounds, phenylsulfone compounds, and compounds containing sulfur and oxygen functional groups.
